

Registration Label

LOCATOR GUIDE

SMOOTH FABRIC SCREENS

The registration label will be placed on the inner "lip" of the cassette. From the front of the screen, using the handle, pull the screen out for enough for you to see inside the cassette. On the "lip" adjacent to the handle will be the registration label. On double screens, if it is not located on the first cassette they check, check the other cassette.

PLEATED FABRIC SCREENS

The registration label will be placed on the inside of the screen cassette pull bar. Looking behind the handle, into the pull bar where the screen is attached to the profile, you should find the label. If you have a multi-panel system, please check all pull bars with a handle to locate the registration label.
