Tailored to fit

Expanse™ is available in a wide range of sizes, designed to fit any enclosed porch project — as a screen window replacement or in new construction.

Innovative design

The dual sash panels are uniquely designed to optimize natural airflow and comfort.

Easy to operate, the retractable panels simply disappear when closed.

Standard fiberglass screen and tempered safety glass included. Additional 2030 Solar Control screen and solarshield glass upgrades are available for even better protection against insects and UV rays.

Although designed to deter moisture, Expanse™ is ideal for those who wish to embrace the elements of nature and expand their living space.
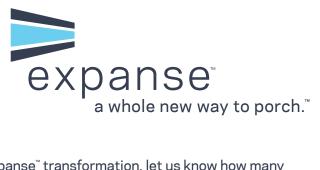

Do it yourself

Easy-to-order and easy-to-install. It's the perfect weekend DIY project.

Increase your property value with the addition of an Expanse™ porch.

Live Better, Outside!

a whole new way to porch.™

Introducing Expanse™, a revolutionary way to extend your outdoor living. Featuring innovative retractable screen technology, Expanse™ transforms your porch into a new kind of living space where the brilliance of nature takes center stage.

Your porch is waiting!

Expanse™ retractable porch and patio panels are designed for areas that function as an extension of the outdoors and are appropriate only for non-heated, non-air conditioned spaces. Expanse™ panels are designed to deter some, but not all moisture. Classified for use in AAMA/NPEA/NSA 2100-12 Category II sunrooms. Refer to your local building code requirements specific to your location. ©2018 Genius Retractable Screen Systems 0980037

Four Easy Steps to Order

Once you've decided that your porch is ready for an Expanse™ transformation, let us know how many panels you need and what your rough opening sizes are. The only tools you're going to need are a tape measure, screwdriver and shims. Let's get started!

1 Measure width
Measure between the jambs at three points: top, middle and bottom of the opening. Measure from the surface of the jambs where the panel will be mounted. Use the smallest of these three measurements to order the panel.

2 Measure height
Measure from the high point of the sill of your opening to the top of the opening. Make three measurements: one at the left side, one at the center and one at the right side. Use the smallest of these three height measurements to order the panel.

3 Measure depth
There must be at least 2-1/2" of opening depth between the inside opening trim and the outside to accommodate the depth of the porch panel.

4 Order your panels
When ordering provide rough opening sizes. For manufacturing purposes, the actual unit size will be 1/2" smaller in width and height than the ordered size.

White	Sandstone	Brown	Black

Standard sizes (White only)	44-1/2" x 72" 56-1/2" x 72" 68-1/2" x 72	44-1/2" x 84" 56-1/2" x 84" 68-1/2" x 84
Custom size range (White, Sandstone, Brown, Black)	Rough opening widths from 24" to 72" Rough opening heights from 30" to 96"	
Upgrades	Screen: 2030 Solar Control Glass: Solarshield (grey or bronze tint)
