- B. Part Number
- C. Frame Color
- D. Options (specify any other desired options)

View and download the installation instructions at:

www.geniusscreens.com

NOTE: Genius screens are designed to support natural ventilation and protection against air born insects and other pests. Windy conditions may affect the performance of the screen. Retract the screen in windy circumstances, during inclement weather and when not needed to support immediate ventilation or prolong periods of time when not used.

OPTIONAL SURFACE MOUNT KITS: At Genius we have developed a Sheer Screen Surface Mount Kit that will allow the option to install the Sheer Screen on the outside of their opening. The traditional, most common, installation for this unit is a recess/in-side mount that is sold as the standard option. The new Surface Mount Kit will allow the Sheer Screen to be installed in different applications that do not typically allow for a recess application (Patio, Terrace, Multi Panel French door, and other non traditional applications).

Depending on the application the Surface Mount Kit can be installed on one, two, three (Fig. B) or all four sides (Fig. C) of the opening. Once installed, the Surface Mount Kit will act as an attractive frame where the Sheer Screen can be attached. Many applications do not need the Surface Mount Kit installed on all sides. Please refer to Genius installation instructions publication 50-00074-0-0 which can be accessed by contacting Genius or by visiting www.geniusscreens.com/installation/.
